

THE GREAT DIVIDING RANGE : Persona Vista (released March 2008)

Introducing **The Great Dividing Range**, Novocastrians by way of the rural NSW town of Maitland.

Born out of the remains of much loved indie rock underdogs **Muzzy Pep** in 2004 and built around the songwriting of singer/guitarist **Scott Blackley**, the band has taken the sound of their self-titled 2005 debut (**ABC Radio Album of the Week**) released on **NonZero Records** and expanded it in all possible directions.

In 2007, **The Great Dividing Range** joined with acclaimed producer and engineer **Shaun O'Callaghan** (**Gyroscope, Eskimo Joe, Little Birdy, Jebediah, John Butler Trio**) to record their new album "**Persona Vista**" in Fremantle, WA.

The new songs encompass a wide musical spectrum and galvanise a distinct character that recalls the white-trash literacy of alt.country acts such as **The Drive-by Truckers** and **Richmond Fontaine**, the ambition of **My Morning Jacket**, and the ambience of **Died Pretty**.

The Great Dividing Range are touring nationwide in 2008 to support the release of the new album. The first double a-side single ("**JuJu Ride**" / "**Into The Light**") has already received airtime on radio (**Triple J, FBI, ABC, Community Radio**) and the video for "Into The Light" broadcast on ABC TV's **Rage**.

The second single (Track 3) "**Grow**" again highlights the band's diversity from an album that continues to reward with each listen.

"**Persona Vista**" is independently released on the band's record label (**V-Dub**). It is available for digital download from iTunes and in CD format via the band's website, MySpace, CDBaby and live shows.

More information and promotional material are available from the band's websites and management.

PERSONA VISTA RELEASED ON V-DUB RECORDINGS MARCH 2008.
